

TREE KEEPER PRO

THE ULTIMATE TREE STORAGE SYSTEM

DECORATED

TK PRO Storage bag & Stand:
 This heavy duty rolling tree stand and storage bag makes it easy to cover up your decorated tree and roll into storage!

NOTE: It may be easier to use with two people.

Use the instructions included with this kit to assemble your rolling tree stand.

Place the TK bag over the tree stand. You may need to open the bag and extend your arm through the bag to line up the center openings of the bag. Make sure the center collar of the stand is extending out of the center of the TreeKeeper. Locate the drawstring tree skirt cover sewn onto the outside seam of the bottom ring. Use this drawstring and tree skirt cover to neatly hide away the remaining fabric.

Once the fabric is neatly hidden away under the tree skirt with the drawstring full tightened, install your tree. Make sure it is securely fastened in the stand.

Now enjoy your tree for the season!

To prepare to cover the tree, loosen the drawstring completely and open the tree skirt. Find the four panels, unzip them, and lay them out on the floor. Grab two adjacent panels and begin zipping them together as you reach them up towards the top of the tree. One by one, zip up the panels of the TreeKeeper.

After you have completely zipped up all the panels, you may locate and tighten the drawstrings around the bottom third of the bag. This will tighten up the bottom branches and remove the loose material from around the tree.

WARNING: Be cautious of ornaments and decorations as they may fall off if insufficiently secured during the covering process.

For more information or assistance, please visit www.TreeKeeperpro.com Or E-mail us at Info@TreeKeeperPro.com

NOTE: for taller trees, you may need to take the top section off and store it under the tree as to fit through doorways.

CAUTION: Use caution when moving the tree as it may tip over if improperly handled.
